The renewal of a department store in the heart of Metz

Located Place de la République, the Galeries Lafayette building has undergone a real transformation, symbol of the city center's metamorphosis in Metz and realized by architect Manuelle Gautrand. Reflecting the economic and social changes of the 19th century, the Department Stores, through their commercial and architectural boldness, are a part of the history of a city. In Metz, the Galeries Lafayette have then been a vector of the city's image, contributing to its touristic and commercial dynamic and successively reflecting its different times.
